Objective

Computer Science undergraduate specializing in AI & ML, seeking an AI/ML or Software Engineering internship. Builds full-stack applications with Python, FastAPI, TypeScript, React, and Next.js, including LLM API integration, explainable scoring logic, REST APIs, and automated tests. Strong foundation in data structures, algorithms, and OOP.

Education

Christ University, Kengeri Campus — Bangalore, India
B.Tech in Computer Science and Engineering (AI & ML Specialization) — *CGPA: 3.2/4.0* — *Expected Graduation: 2029*

Sacred Heart International School — Marthandam, Tamil Nadu
Class XII, ISC Board — *Percentage: 90.25%* — *2025*

Sacred Heart International School — Marthandam, Tamil Nadu
Class X, ICSE Board — *Percentage: 91%* — *2023*

Technical Skills

- **Languages:** Python, TypeScript, Java, C, C++, C#, SQL
- **Frameworks & APIs:** FastAPI, SQLAlchemy, Pandas, Next.js, Zod, Unity, Google Gemini API
- **Databases & Tools:** SQLite, MySQL (Fundamentals), Git, GitHub, VS Code, Vercel, Render
- **Core Competencies:** Data Structures & Algorithms, OOP, REST API Design, LLM API Integration, Unit Testing, Embedded Systems

Projects

FakeGuard – Social Media Account Risk Analyzer — *Python, FastAPI, SQLite, React, TypeScript*
- Built a full-stack prototype that scores accounts from 0–100 using five weighted behavioral features (account age, follower ratio, posting rate, profile completeness, engagement).
- Generated 1,006 synthetic accounts across 8 behavioral archetypes and built FastAPI endpoints for scoring, dashboard analytics, and CSV batch import, with a React review dashboard.
- Made each score explainable with per-feature breakdowns and reason codes, renormalized weights for missing metrics, and covered the scoring engine and API with 24 passing pytest tests.

AI Personal Tutor | Live — *Next.js, TypeScript, Google Gemini API, SQLite, Zod*
- Integrated the Gemini API for step-by-step tutoring and quiz generation from user-uploaded PDF and TXT notes.
- Validated LLM-generated quiz questions with Zod schemas, discarding malformed ones, and graded answers server-side so answer keys never reach the browser early.
- Added Gemini model fallback on rate-limit and outage errors, tracked weak topics in SQLite, and deployed on Render.

Daymark – Personalised Study Planner | Live — *React, TypeScript, Vite, Recharts*
- Separated plan creation, prioritization, and exam-readiness logic into a typed TypeScript layer apart from the UI.
- Wrote a rule-based (regex and keyword) parser that turns free-text requests such as limited time or an exam tomorrow into explained plan changes the user reviews before applying.

Certifications

- Azure AI Fundamentals – Microsoft, via Certiport (Sep 2026)
- Introduction to Modern AI – Cisco Networking Academy (Sep 2026)
- Introduction to Data Science and AI – IIT Madras, Centre for Outreach and Digital Education (Apr 2025)
- Programming Fundamentals using Python (Parts 1 & 2), Fundamentals of Responsible AI, Software Engineering and Agile Software Development – Infosys Springboard (2026)

Languages & Interests

- **Hackathons:** Participated in Adobe University Hackathon (Adobe) and InHack Hackathon, Media Meet 2026 (CHRIST University)
- **Languages:** English (Fluent), Tamil (Native), Malayalam
