Objective

Computer Science undergraduate (AI & ML specialization) seeking AI, data analytics, or software engineering internships. Uses Python, Pandas, NumPy, and SQL to clean, validate, and organize data, and has built an explainable scoring backend in FastAPI with 24 passing tests. Strong foundation in data structures, algorithms, and analytical problem-solving.

Education

Christ University, Kengeri Campus — Bangalore, India
B.Tech in Computer Science and Engineering (AI & ML Specialization) — *CGPA: 3.2/4.0* — *Expected Graduation: 2029*

Sacred Heart International School — Marthandam, Tamil Nadu
Class XII, ISC Board — *Percentage: 90.25%* — *2025*

Sacred Heart International School — Marthandam, Tamil Nadu
Class X, ICSE Board — *Percentage: 91%* — *2023*

Technical Skills

- **Languages:** Python, SQL, TypeScript, Java, C, C++
- **Data & AI:** Pandas, NumPy, scikit-learn, Matplotlib, Seaborn, Google Gemini API
- **Backend & Tools:** FastAPI, REST APIs, SQLAlchemy, SQLite, MySQL (Fundamentals), Git, GitHub, VS Code
- **Core Competencies:** Data Cleaning & Preprocessing, Data Validation, Data Structures & Algorithms, OOP, Unit Testing

Projects

FakeGuard – Social Media Account Risk Analyzer — *Python, FastAPI, Pandas, NumPy, SQLite*
- Generated a reproducible dataset of 1,006 synthetic accounts across 8 behavioral archetypes with NumPy and Pandas, stored in SQLite through SQLAlchemy.
- Built explainable 0–100 rule-based risk scoring over five weighted behavioral features, renormalizing weights when metrics are missing and attaching reason codes.
- Validated CSV imports for missing columns, schema errors, and duplicates with row-level error reports, and covered the engine and API with 24 passing pytest tests.

Titanic Data Cleaning (Coursework) | Code — *Python, Pandas, scikit-learn, Seaborn*
- Profiled 891 records, imputed 177 missing ages (median) and 2 ports (mode), and dropped the 77%-empty Cabin column.
- Applied label and one-hot encoding to categorical features, plotted the age distribution with Seaborn, and exported the cleaned dataset to CSV.

AI Personal Tutor | Live — *Next.js, TypeScript, Google Gemini API, SQLite*
- Built a Gemini-based tutor that generates quizzes from uploaded PDF/TXT notes, validating LLM output with Zod schemas and grading answers server-side.
- Tracked accuracy, quiz scores, weak topics, and missed questions in a six-table SQLite schema; deployed on Render.

Certifications

- Introduction to Data Science and AI – IIT Madras, Centre for Outreach and Digital Education (Apr 2025)
- Azure AI Fundamentals – Microsoft, via Certiport (Sep 2026)
- Introduction to Modern AI – Cisco Networking Academy (Sep 2026)
- Programming Fundamentals using Python (Parts 1 & 2), Fundamentals of Responsible AI – Infosys Springboard (May–Jun 2026)

Languages & Interests

- **Hackathons:** Participated in Adobe University Hackathon (Adobe) and InHack Hackathon, Media Meet 2026 (CHRIST University)
- **Languages:** English (Fluent), Tamil (Native), Malayalam
