Objective

Computer Science undergraduate specializing in AI & ML, seeking an AI/ML internship to build and evaluate practical AI solutions. Uses Python with Pandas, NumPy, and scikit-learn for data cleaning, encoding, and introductory classification; has integrated an LLM API into a deployed app and built a tested FastAPI backend.

Education

Christ University, Kengeri Campus — Bangalore, India
B.Tech in Computer Science and Engineering (AI & ML Specialization) — *CGPA: 3.2/4.0* — *Expected Graduation: 2029*

Sacred Heart International School — Marthandam, Tamil Nadu
Class XII, ISC Board — *Percentage: 90.25%* — *2025*

Sacred Heart International School — Marthandam, Tamil Nadu
Class X, ICSE Board — *Percentage: 91%* — *2023*

Technical Skills

- **Programming:** Python, SQL, TypeScript, Java, C, C++
- **Data & Databases:** Pandas, NumPy, Matplotlib, Seaborn, SQLite, SQLAlchemy, MySQL (Fundamentals)
- **AI/ML Fundamentals:** scikit-learn (encoding, Decision Tree, train/test split, accuracy), LLM API Integration (Google Gemini)
- **Backend & Engineering:** FastAPI, REST APIs, Git, GitHub, VS Code, Unit Testing
- **Analytical:** Data Structures & Algorithms, Data Cleaning, Missing-Data Handling, Data Validation

Projects

FakeGuard – Social Media Account Risk Analyzer — *Python, FastAPI, SQLite, Pandas, NumPy*
- Built a FastAPI and SQLite backend with 12 REST endpoints that applies explainable rule-based scoring over five weighted behavioral features.
- Renormalized weights for missing metrics and returned reason codes and per-feature breakdowns with each score.
- Generated 1,006 reproducible synthetic accounts with NumPy and Pandas; verified engine and API with 24 passing tests.

AI Personal Tutor | Live — *Next.js, TypeScript, Google Gemini API, SQLite*
- Integrated the Gemini API with prompt templates for tutoring and quiz generation from uploaded PDF/TXT notes.
- Requested structured JSON quiz output, validated it with Zod schemas, and added fallback across Gemini models on rate-limit errors.

Machine Learning Coursework | Code — *Python, Pandas, scikit-learn, Seaborn*
- Cleaned the 891-row Titanic dataset: imputed 177 missing ages (median) and 2 ports (mode), dropped the 77%-empty Cabin column, and applied label and one-hot encoding.
- Trained a scikit-learn decision tree on a small music-genre dataset with a train/test split and accuracy scoring.

Certifications

- Introduction to Data Science and AI – IIT Madras, Centre for Outreach and Digital Education (Apr 2025)
- Azure AI Fundamentals – Microsoft, via Certiport (Sep 2026)
- Introduction to Modern AI – Cisco Networking Academy (Sep 2026)
- Programming Fundamentals using Python (Parts 1 & 2), Fundamentals of Responsible AI – Infosys Springboard (May–Jun 2026)

Languages & Interests

- **Hackathons:** Participated in Adobe University Hackathon (Adobe) and InHack Hackathon, Media Meet 2026 (CHRIST University)
- **Languages:** English (Fluent), Tamil (Native), Malayalam
